

# TENOR SAXOPHONE

## **SUPER ACTION 80 SERIE II**

*Our historical model*

The Super Action 80 Serie II tenor has earned a solid reputation for its very different personality. It allows the production of an open, harmonically rich sound with excellent projection power.

Released in 1986, this makes it the longest-lived tenor among the various tenor models in the catalog. Its marked angulation gives it a very specific timbre and a particular grain of sound, highly distinctive, with a lot of character.

This specific angulation also determines a playing position, specific to this model. This very specific geometry allows him a great finesse of sound while having a great capacity of projection.

A tenor that you have to get to know to discover all its richness.
