

B \flat /A CLARINETS

RECITAL

A historic and an atypical model

A sophisticated bore, as well as the material, a specially selected and worked grenadilla wood, have made possible the genesis of a unique tone: noble and living matter, the wood itself gives the Recital this warm, rich and round tone, with an exceptional presence.

A lot of expressiveness in this clarinet which will seduce those who are looking for 'a sound'. An original design for an acoustic result of a rare quality.

The Recital clarinet has body dimensions 2mm larger (in diameter) than other models.

TECHNICAL FEATURES

Key: B \flat and A

Bore diameter: 14.35 mm
