

E \flat CLARINET

MUSE

Play confidently in any situation

The E \flat Muse clarinet was born out of the acoustic qualities of the E \flat Recital and our latest improvements in pitch accuracy, ergonomics and mechanics. This new tool will help you to play confidently in any situation.

The E \flat Muse clarinet is the clarinetist's trusted tool: its bore, its exterior diameter, its balanced pitch, its new ergonomics and its mechanics benefit from the rigorous conception and excellent fabrication quality of Henri SELMER Paris clarinets.

Its unique dimensional characteristics and the quality of the wood give the musician the freedom to round out the instrument's timbre, naturally rich in harmonics.

Free your artistic potential and inspire the world with the Muse!
