

BASS SAXOPHONE

SUPER ACTION 80 SERIE II

The world reference for bass saxophone

The bass saxophone is an extremely rare and demanding instrument. With the evolution of repertoires instruments with extreme ranges are more and more requested.

The Super Action 80 Serie II bass saxophone is particularly adapted to this new trend: its design and acoustic features enable it to be more than just a 'support' instrument and to play more in overtones as well as any other instrument with a more conventional range.

It offers a real technical virtuosity through optimized ergonomics.
