

SOPRANINO SAXOPHONE

SUPER ACTION 80 SERIE II

A great precision of play, a rich and full tone

The E♭ sopranino saxophone is a very delicate instrument both in its approach to playing and in its manufacturing. It is the highest voice in the saxophone family and is increasingly used in all musical genres.

The Super Action 80 Serie II sopranino has a good general emission and an attractive timbre: despite its ambitus, it has a warm sound and a very strong relationship with the E♭ alto.

It is fully integrated in the Super Action 80 Serie II spirit, while asserting a real personality.
