

# SOPRANO SAXOPHONE

## SERIE III

*Richness of tone and playing*

The Henri SELMER Paris Series III soprano offers a beautiful roundness of sound and a great richness of tone. It is characterized in particular by its great ease of response, especially in the high notes.

Its ambitus is extended by the addition of a key allowing to reach the high G. Thanks to its ergonomics, it offers a comfort of play quite similar to that of the alto.

Comfort is increased by the choice between two removable necks, one straight and the other curved, allowing an alternative in terms of playing position and sound.
