

SOPRANO SAXOPHONE

SIGNATURE

*The full expressive power of the soprano.
Without compromise.*

Representing the renewal of the Series III, the Signature model makes the instrument immediately more accessible to play. It offers a level of relaxation and playing ease never before experienced on a soprano.

By providing easier access to the soprano's appealing, round sound, while naturally avoiding excessive tonal edge, it offers exceptionally even intonation and tonal consistency through to the upper and altissimo registers, making these registers particularly easy to produce. The reliable response of the low register and right-hand notes inspires confidence, while the stability of the upper register remains exceptional, even at the softest dynamics.

Its ergonomics benefit from a new neck socket system with three-point concentric clamping, providing a more secure connection between the body and the neck; an adjustable nickel-silver clamping ring for greater density and strength; and an octave-key mechanism with Teflon bearings for smoother mechanical action.
